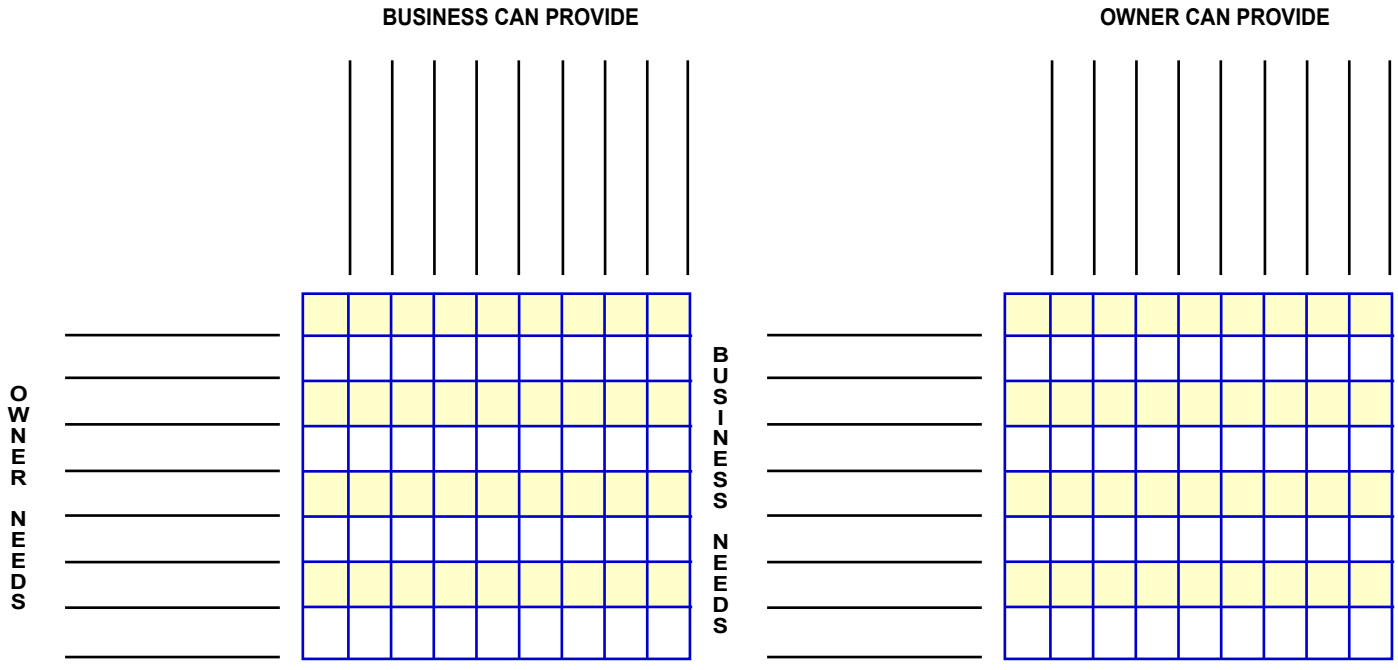
Owner-Business Fulfillment Grid

What do you want to achieve during the next five years? Can you and your business each provide what the other needs? Find out by completing the Owner/Business Fulfillment Grid.


Instructions: Print out the grid and fill it out--it will help you to see how well you and your business match up and how much fulfillment you have. On the first grid, list your owner needs and what the business can provide. On the second grid, list what the business needs from you and what you, as an owner, can provide. The more specific you can be, the better. After you have completed both grids, place a check mark where there is a match. If there are personal needs that are not business related, add those on the back of the page.
